MicroCO/SmokeCheck

Essential Tool for Smoking Cessation and Carbon Monoxide monitoring

As someone who is involved in the field of smoking cessation, you are only too well aware of the dangers caused by smoking. What you need is a means of quickly and effectively monitoring your patient's carbon monoxide levels—and then convincingly persuading them of the risks they bring upon themselves by smoking.

Micro Direct offers two models of carbon monoxide monitors specifically designed for your needs.

MicroCO

The **MicroCO** is the gold standard in CO breath testing and is the most advanced system currently available today. Some of its many features include fast response time, 1 ppm resolution, immediate display of CO levels in PPM and %COHb, color light indicators, capable of interfacing with COBRA, a windows based software package for performing and storing real time breath tests on your PC.

SmokeCheck

The **SmokeCheck** is designed as a simple screening test for cigarette consumption. Displaying an instant indication of CO levels in PPM and backed up with color light indicators, the SmokeCheck is the most cost effective CO monitor available today. Conversion of PPM results to %COHb is easily obtained using the SmokeCheck's smoking cessation guide chart.

COBRA Software

COBRA offers a unique opportunity for performing and storing carbon monoxide breath tests. Based on a MicroSoft Word document, the CO report can easily be customized with logos, headings and other information. A single icon click launches a CO test allowing real-time control and display once connected to the MicroCO.

Features

- Small, lightweight and portable
- Zero warm-up time
- Easy to use, clean and maintain
- Simple calibration routine
- Single switch operation
- Auto-zero facility
- Color light indicators
- Audible warning tone for high CO levels
- Supplied with all accessories in a sturdy carrycase
- Breath-hold countdown timer (MicroCO only)
- Cobra PC software (MicroCO only)
- RS232 output (MicroCO only)
